

PNDF-01194 **** AFTER FINAL: EXPEDITED ACTION **** 00760070aa
Amendment dated 06/09/2004 Reply to office action mailed 03/31/2004

The following is a complete listing of all claims in the application, with an indication of the status of each:

Listing of claims:

- 1 1. (currently amended) A communication device, comprising:
 - 2 a key-input section in which key operations are input by a user;
 - 3 a key-operation storing section for storing key-input information input
 - 4 in said key-input section;
 - 5 a display section for displaying said key-input information, which has
 - 6 been stored in said key-operation storing section;
 - 7 a non-volatile memory section for storing as an operational procedure
 - 8 key-input information selected by the user ~~with the use of said key-input~~
 - 9 ~~section~~ from said displayed key-input information, said displayed key-input
 - 10 information being the key-input information displayed on said display section
 - 11 as a series of key-input information; and
 - 12 a control section for executing said operational procedure by
 - 13 sequentially executing said selected series of key-input information, which has
 - 14 been stored in said non-volatile memory section as a sequence of
 - 15 combinations of keys.

- 1 2. (previously presented) A communication device as claimed in claim 1,
 - 2 wherein:
 - 3 said display section displays said key-input information in accordance
 - 4 with an order that said key-input information was stored in said key-operation
 - 5 storing section.

Amendment dated 06/09/2004 Reply to office action mailed 03/31/2004

1 3. (previously presented) A communication device as claimed in claim 1,
2 wherein:
3 said key-input information in the form of said selected series is stored
4 in said non-volatile memory section in a condition in which a functional name
5 has been assigned to said key-input information.

1 4. (previously presented) A communication device as claimed in claim 2,
2 wherein:
3 said key-input information in the form of said selected series is stored
4 in said non-volatile memory section in a condition in which a functional name
5 has been assigned to said key-input information.

1 5. (previously presented) A communication device as claimed in claim 1,
2 wherein:
3 said key-input information in the form of said selected series is
4 allocated to a softkey disposed in said key-input section to be enrolled.

1 6. (previously presented) A communication device as claimed in claim 2,
2 wherein:
3 said key-input information in the form of said selected series is
4 allocated to a softkey disposed in said key-input section to be enrolled.

1 7. (previously presented) A communication device as claimed in claim 3,
2 wherein:
3 said key-input information in the form of said selected series is
4 allocated to a softkey disposed in said key-input section to be enrolled.

1 8. (previously presented) A communication device as claimed in claim 1,
2 wherein:
3 said control section makes a display of an indication for confirming
4 whether execution of said key-input information is to be started or not on said
5 display section before executing sequentially said key-input information in the
6 form of said selected series, and said execution of the key-input information is
7 started in the case where there was such an input by a user through said key-
8 input section to the effect that said execution of the key-input information
9 should be started.

1 9. (previously presented) A communication device as claimed in claim 2,
2 wherein:
3 said control section makes a display of an indication for confirming
4 whether execution of said key-input information is to be started or not on said
5 display section before executing sequentially said key-input information in the
6 form of said selected series, and said execution of the key-input information is
7 started in the case where there was such an input by a user through said key-
8 input section to the effect that said execution of the key-input information
9 should be started.

1 10. (previously presented) A communication device as claimed in claim 3,
2 wherein:
3 said control section makes a display of an indication for confirming
4 whether execution of said key-input information is to be started or not on said
5 display section before executing sequentially said key-input information in the
6 form of said selected series, and said execution of the key-input information is
7 started in the case where there was such an input by a user through said key-

8 input section to the effect that said execution of the key-input information
9 should be started.

1 11. (previously presented) A communication device as claimed in claim 4,
2 wherein:

3 said control section makes a display of an indication for confirming
4 whether execution of said key-input information is to be started or not on said
5 display section before executing sequentially said key-input information in the
6 form of said selected series, and said execution of the key-input information is
7 started in the case where there was such an input by a user through said key-
8 input section to the effect that said execution of the key-input information
9 should be started.

1 12. (previously presented) A communication device as claimed in claim 5,
2 wherein:

3 said control section makes a display of an indication for confirming
4 whether execution of said key-input information is to be started or not on said
5 display section before executing sequentially said key-input information in the
6 form of said selected series, and said execution of the key-input information is
7 started in the case where there was such an input by a user through said key-
8 input section to the effect that said execution of the key-input information
9 should be started.

1 13. (previously presented) A communication device as claimed in claim 1,
2 wherein:

3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected series relates to an
5 operational procedure for transmission and/or reception of e-mail.

PNDF-01194 **** AFTER FINAL: EXPEDITED ACTION **** 00760070aa
Amendment dated 06/09/2004 Reply to office action mailed 03/31/2004

1 14. (previously presented) A communication device as claimed in claim 2,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected series relates to an
5 operational procedure for transmission and/or reception of e-mail.

1 15. (previously presented) A communication device as claimed in claim 3,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected series relates to an
5 operational procedure for transmission and/or reception of e-mail.

1 16. (previously presented) A communication device as claimed in claim 4,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected series relates to an
5 operational procedure for transmission and/or reception of e-mail.

1 17. (previously presented) A communication device as claimed in claim 8,
2 wherein:
3 a capability for transmitting and receiving e-mail is involved, and said
4 key-input information in the form of said selected series relates to an
5 operational procedure for transmission and/or reception of e-mail.

1 18. (previously presented) A communication device as claimed in claim 1,
2 wherein:

3 a capability for linking to Internet is involved, and said key-input
4 information in the form of said selected series relates to an operational
5 procedure for accessing to a specific site on Internet.

1 19. (previously presented) A communication device as claimed in claim 2,
2 wherein:

3 a capability for linking to Internet is involved, and said key-input
4 information in the form of said selected series relates to an operational
5 procedure for accessing to a specific site on Internet.

1 20. (previously presented) A communication device as claimed in claim 3,
2 wherein:

3 a capability for linking to Internet is involved, and said key-input
4 information in the form of said selected series relates to an operational
5 procedure for accessing to a specific site on Internet.

1 21. (previously presented) A communication device as claimed in claim 4,
2 wherein:

3 a capability for linking to Internet is involved, and said key-input
4 information in the form of said selected series relates to an operational
5 procedure for accessing to a specific site on Internet.

1 22. (previously presented) A communication device as claimed in claim 8,
2 wherein:

3 a capability for linking to Internet is involved, and said key-input
4 information in the form of said selected series relates to an operational
5 procedure for accessing to a specific site on Internet.
